- Dual AZ 850 Air Data Computers
- Dual AHZ 800 AHRS
- Dual IC600
- Dual Honeywell RNZ 851 Nav Units
- Dual Honeywell RCZ 833K Comm Radios
- Third Honeywell RCZ 833K Comm for Jumpseat
- Dual IC600
- Auto Pilot controllers
- Dual RM855
- Radio Management Units
- RT300
- Radio Altimeter
- RVSM Equipped
- Dual ADF
- Dual DME

Specs

Interior

This aircraft is configured for 13 VIP passengers. The aircraft has a double club seating configuration in the forward cabin, with a four place dining group across the aisle from a storage credenza in the mid cabin. The aft cabin has two facing seats across the aisle from a berthable divan. The interior includes an aft VIP lavatory with flushing toilet, hand sink and ample storage for amenities.

Galley Equipment

Convection ovens are installed in the aircraft to allow for meal preparation, as well as a coffee maker. The galley has a sink with running water, including a water heater system. There is an ice drawer with drain system as well. There is ample storage for catering supplies, drinks, wine, dishes and silverware in the storage area above the galley. The galley is separated from the cabin by dual sliding pocket doors.

Entertainment

The aircraft is outfitted with a dual cabin zone entertainment system, allowing two movies to play simultaneously on separate screens. There are Dual DVD/CD players connected to the entertainment system as well as a VCR player installed. There is a single 15.1 inch LCD monitor in the forward left hand bulkhead and a single 15.1 inch LCD monitor on the aft left hand bulkhead. For updates on inflight progress, the Airshow 4000 system is installed. There is an optional additional VIP controller in the aft cabin section. The forward section and the aft section have their own temperature controller as well, allowing dual temperature zones to provide for maximum comfort of the passengers during longer flights. The aircraft cabin is equipped with 10 electric outlets for in flight power with another plug in the lavatory. In flight communication is available on this aircraft, with its Aircell Iridium SATCOM ST3100 satellite communications phone, with two handsets in the cabin.

Baggage Compartment

The Legacy 600 has the largest fully pressurized baggage compartment on the executive jet market, at 240 cubic feet (6.8 cu meters). The baggage compartment is fully accessible in flight and at altitude. In addition, there are large areas of internal storage in the lavatory, galley and credenza, plus ample storage in the cabin itself due to the straight aisle configuration providing even more storage for the most comfortable flights and easier access to hand baggage.
